

Synappx™ mDesk

Auto-start meetings at home

About Synappx mDesk

Synappx mDesk is designed for the flexible workstyle, making everyday collaboration more efficient and productive, whether working from home or the office.

Challenges:

Although working from home has its joys, it also has certain challenges when it comes to utilising technology:

- More web conference calls.
- Various types of web conference services - Zoom, GoToMeeting™, Microsoft® Teams, and more!
- Delayed meetings due to searching for meeting invites, opening the calendar, and looking for URLs and IDs.

Synappx mDesk advantages:

- **Starting a meeting:** Scheduled meetings appear on the launcher, providing a snapshot of daily meeting activities. Auto-start a meeting with a popular web conference service with one click.
- **During a meeting:** Track the meeting time and access shortcuts to your files.
- **End a meeting:** Synappx helps automatically disconnect the web conference to allow the next meeting to start on time.

Meeting efficiency for your virtual workplace

Scheduled meetings can start with one click, connecting your web conference without looking for meeting URLs or IDs. The countdown timer appears before a meeting is scheduled to start, allowing organisers and attendees to start meetings on time.

- The meeting countdown timer ensures you join the meeting on time
- Auto-start web conferences like Zoom, Microsoft Teams, or Google Meet

Your trusted assistant during the meeting

Even at your home office, the Synappx Meeting Assistant helps you be more efficient and productive.

- Visual meeting timer to manage the meeting
- Access to meeting invite attachments, files in cloud storage services and folder shortcuts
- Keep track of the agenda

End your meeting on time

When the meeting ends, it automatically disconnects the web conferences*, allowing the next meeting to start on time.

Synappx Admin Portal for central management

The Synappx Admin Portal allows you to track and manage Synappx applications from one location. Here administrators gain central control of all necessary components of Synappx applications. Visualised data is available to give administrators insight into organisational trends.

Security is our number one priority

Security is always at the forefront of Sharp's innovative technology. With Microsoft® Azure, Microsoft® 365, G Suite™ technologies and Sharp's security best practices, Synappx applications and services are protected by layered security. To learn more about Synappx security, download our security white paper.

For more information, please visit www.sharp.co.uk/synappx-mdesk

For detailed information such as supported environments and directions to use the app, visit our Support Centre at www.sharp.co.uk/synappx-mdesk/support

*Automatic disconnection of web conferences is enabled only when the web conference is started with the client application and does not support web browser-based meetings.
