Microsoft 365 Business Premium

Microsoft 365 Business Premium is an integrated solution, bringing together the best-in-class productivity of Microsoft 365 Business Standard with advanced security and device management capabilities.

Purpose built for small and medium sized businesses, Microsoft 365 Business Premium gives you best-in-class productivity and collaboration. With capabilities such as Outlook, OneDrive, Microsoft Teams, SharePoint and business apps as well as device management and security solutions it enables your teams to work smarter and safer from anywhere, from any device. At Sharp we have a wealth of knowledge around Microsoft having been top tier Microsoft partners for many years.

What's Included?

Microsoft 365 Business Premium bundles together Microsoft 365 Business Standard, Windows 11, and Enterprise mobility and security.

Microsoft 365 Business Premium gives you access to Windows 11, the latest Microsoft operating system.

SHARP

Be Original.

Key Features and Benefits

Productivity

Including Word, Excel, PowerPoint and OneNote meaning your team can quickly create, edit and improve documents from anywhere at any time.

Email

Sign in to your account and access Outlook email and calender from anywhere.

Collaboration

With SharePoint and OneDrive, your teams can share and collaborate on content together, even if they are working from different locations.

Chat

With Teams, add anyone to your meetings with just one click. You can record meetings, and schedule them straight from Outlook.

Device & Data Protection

Provides data encryption for your end user devices protecting them against loss or theft. Provides protection and encryption for email and file data, ensuring sensitive data cannot be shared or copied.

Device Management

All devices whether Windows, MacOS, iOS or Android based can be centrally managed and secured. Devices can be remotely wiped or have all business data removed remotely.

Device Deployment

New devices, such as laptops, can be used straight off the shelf without any IT configuration. Simply logging on with your business email address will enrol the device, install software and secure it.
